RFID Returns Unit

Automated returns and receipt printing -
 Your users are free to borrow more books.

How do I use it?

Ready

Scan item

Magnetic door is unlocked

Scan next item

Item is accepted

Wrong item inserted

Press button for receipt

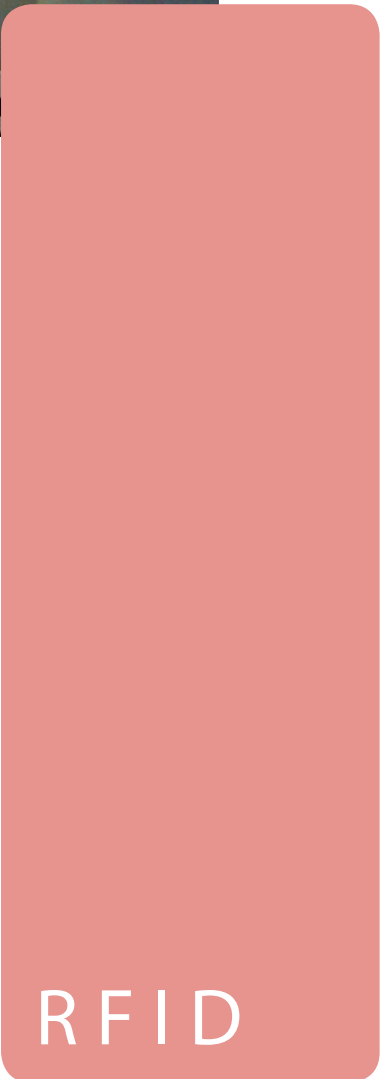

Ready

How does it work?

- The Returns Unit checks and accepts only correctly tagged items. The door is only unlocked when a valid item is presented.
- The correct item must be then inserted to produce receipt.
'The wrong item / no item = no receipt!' (Transaction fail.)
- Correctly processed items are removed from the user's account.
- Staff are alerted to holds and trapped items in the bin.

The YQ5500 Returns Unit is just one of 2CQR's innovative products designed to ensure that your investment in RFID brings benefits for your users and your staff again and again.
