

Multiple interfaces.  
Cash and ChipNpin facilities.  
Large touch screen.  
It's the...

## RFID Slimline Kiosk

Boasting a 19 inch touch screen, barcode scanner, mifare reader and receipt printer in it's elegant design... this is style **and** substance.

The super sleek **Slimline Kiosk**. Designed for RFID sites, it is easily capable of incorporating multiple interfaces. Barcode scanner, Mifare reader and receipt printer come as standard, Cash and ChipNpin are available as an optional extra and a generous 19 inch touch screen finishes off the modern styling available in green or blue acrylic trim.

### The technicals:

The Slimline Kiosk occupies a footprint of 610 x 600mm. A silent, fan-less PC unit and power supply drives all interfaces and a beautiful acrylic surround completes a functional DDA compliant unit by having all interfaces in a single easily accessed plane. Power consumption is between 150 - 200W. A dual 'domestic' 230V power point and Ethernet connection (wired or WiFi) is required.

### IT Specification:

- The built in PC can be fan-less (Celeron) or low power fan-cooled (1GHz Pentium).
- Windows XP Professional operating system.
- 80GB + hard drive (unit does not store data)
- 512 MB RAM as standard
- Multiple Serial / USB ports fitted as required.
- One Ethernet connector and one USB connector are free for connectivity and administration requirements respectively.
- The 2CQR self-service software provides User Interfaces and LMS connectivity via SIP and/ or Web-Services.

**Whole of life** can be quoted, which includes supply, warranty, maintenance and (if required) environmentally friendly end of life disposal
