

RFID Baby

Upgrade to RFID and feel liberated with a baby!

Available in green or blue glowing Perspex the **Baby** desktop self service unit is perfect for smaller libraries that are upgrading their security to RFID. Simple to use, the **YQ2000 baby** is child's play offering a well laid out, logical operating system. A fines payment unit is also available and both can be upgraded to RFID use without the need to re-invest in a new workstation. Mifare and other smart card technologies are also supported.

Design a baby! Add any of our optional extras.

- **Cash fines payment:**
Fines can be paid in coins with change given.
- **Chip n' Pin:**
A convenient, modern payment method.
- **My Fare:**
Cards are accepted.

Whole of life can be quoted, which includes supply, warranty, maintenance and (if required) environmentally friendly end of life disposal
